PL655 Padlock (FF-P-2827A)
3/8" shackle
1-1/4" clearance

Durability In Extreme Environments

The unique construction of ABLOY® locks, the chrome plated lock body, and the hardened steel boron shackle ensure lasting durability in extreme environments including wear, dirt, moisture, corrosion and freezing.

Exclusive Government Key Profile

For projects demanding special levels of security, ABLOY® Padlocks provide an exclusive, *Government restricted key control profile*.

Quick Change Cylinder

The quick-change cylinder design enables immediate rekeying in the field in the instance of lost or stolen keys, providing uninterrupted security.

ABLOY Rotating Disc Cylinder

This sophisticated system is virtually pick-proof and protects against other forms of surreptitious entry, while ensuring lasting functional durability.

Heel & Toe Locking

Hardened stainless steel ball bearings dead-lock the shackle at both ends for a strong hold. This provides additional strength against prying and pulling tools.

Lifetime Functional Warranty

If the product should fail due to wear & tear, environmental conditions or defects in materials or workmanship, Abloy Security, Inc. will repair or replace the lock at NO CHARGE.

PL656 Padlock (FF-P-2827B)
1/2" shackle
1-1/2" clearance
